

COVID Vaccine VAERS Reports of Death - March 2021

Notes	Vaccine Type	Vaccine Manufacturer	VAERS ID	Age	Onset Interval	Adverse Event Description
	COVID19 VACCINE	JANSSEN	1117078-1	65+ years	0 days	Patient died approx. 5 hours after shot was administered. Cause of death reported is Atherosclerotic Cardiovascular Disease. The death certificate was signed by the county coroner without autopsy, based on the report by the onsite deputy coroner. No doctors or hospitals were involved. This report is FYI only; there has been no direct connection made between my mother's death and the vaccine other than one followed shortly after the other.
	COVID19 VACCINE	JANSSEN	1118314-1	50-59 years	0 days	She received the Johnson and Johnson vaccine on Wednesday and died on Sunday 3/14/2021. Her autopsy is pending.
	COVID19 VACCINE	JANSSEN	1126732-1	65+ years	0 days	The decedent had significant medical conditions. The wife stated, the appointment for the vaccine shot was made on-line. Dept. of Health visited their home on 3/16. The shot was administered into the decedent's left arm at 0930hrs. The decedent expressed no health complaints and had no visible indications of adverse affects. The decedent was found not breathing supine in bed at 2347hrs 3/16 (same day as vaccine shot).
	COVID19 VACCINE	JANSSEN	1126863-1	65+ years	0 days	Patient was vaccinated in her home (COVID J&J) on 3/8. Vaccinator obtained consent and confirmed throughout the process that patient as at baseline since patient was nonverbal and bedbound. Later that same day she experienced an emergency and was take to the hospital and subsequently admitted to ICU. She died on 3/10, family present, on comfort care. Per HPI, ""Patient is a 85 y.o. female with advanced dementia (non verbal, wheelchair bound at baseline), chronic aspiration, recurrent UTIs, voiding dysfunction currently self-straight cathing, has suspicious bladder and gallbladder masses (being worked up), has right sided hydronephrosis, BIBEMS for acute hypoxemia, difficult to bag en route, ED had difficulty intubating and so performed cricothroidotomy. Patient had brief PEA arrest due to hypoxia. ED provider noted ""excessive pulmonary edema in airway, unfavorable anatomy, and airway swelling."" Suspected insult stemming from J&J COVID vaccination reaction.""
	COVID19 VACCINE	JANSSEN	1131084-1	65+ years	0 days	My sister died in her sleep six days after receiving the J&J vaccine in her sleep.
	COVID19 VACCINE	JANSSEN	1141989-1	65+ years	0 days	Patient received Johnson and Johnson vaccine at approx 1:30 pm and passed away on 11:03 pm - May 24, 2021. Was told around 10:20 pm, the patient was experiencing trouble breathing, cold, clammy, non-responsive .
	COVID19 VACCINE	JANSSEN	1142965-1	65+ years	0 days	Following the vaccination, individual ate lunch and then returned home. Later found deceased in chair in home ~8 hours after vaccine. No known symptoms. However no one was at home with individual for prolonged period of time during this time frame.
	COVID19 VACCINE	JANSSEN	1143912-1	65+ years	0 days	Suspected pneumonitis. Patient presented on day following vaccination as shortness of breath, nausea, and diarrhea were not abating with home management. They had started later in the day after the vaccination. At ER admission - SpO2 = 80% room air. Nasal cannula was applied and SpO2 recovered quickly. BNP was elevated so acute exacerbation of heart failure was suspected and treated. However, patient did not improve with diuresis. Viral workup and bacterial cause workup negative. No acute cardiac events discovered. Patient continued to decline. Transferred to ICU on 3-19-21 to use BiPAP with 65% FiO2 and able to take breaks to 15L nasal cannula. Borderline blood pressures at this time. Infectious disease, pulmonology, cardiology, nephrology, and critical care anesthesia services evaluated and ruled out multiple possible diagnoses and patient continued to decline. Diagnostic bronchoscopy on 3-22-21 with BAL lead to patient ventilator dependent with profound hypotension. Aggressive ICU management ensued. Bronchoscopy very clean with no real secretions - in line with CT evidence of pneumonitis. Despite aggressive care and maximized pressor support, patient expired on 3-29-21 when family chose to withdraw care as blood pressure declined again.
	COVID19 VACCINE	JANSSEN	1144617-1	65+ years	0 days	Patient was found deceased in her home by her daughter 9+ hours after receiving the vaccine. The was no indication of how long the patient had been deceased prior to being discovered.
	COVID19 VACCINE	JANSSEN	1154639-1	30-39 years	0 days	Patient began having seizures about four hours post vaccine while at a friends house and passed away
	COVID19 VACCINE	MODERNA	1073773-1	65+ years	0 days	Patient was found deceased later in the afternoon.

COVID19 VACCINE	MODERNA	1073808-1	65+ years	0 days	Prt was found deceased
COVID19 VACCINE	MODERNA	1075657-1	65+ years	0 days	Resident was having back pain but did have previous back pain prior too.
COVID19 VACCINE	MODERNA	1077236-1	65+ years	0 days	Family states patient had been coughing and was weak after the vaccine. Patient walked to the bathroom and then fell striking her head found in PEA with agonal breathing. Despite aggressive CPR medications patient remained in asystole. Unknow if Moderna or Phifer
COVID19 VACCINE	MODERNA	1078246-1	65+ years	0 days	Death. Ruptured myocardial infarct.
COVID19 VACCINE	MODERNA	1081279-1	65+ years	0 days	Patient seen by physician for weakness, tired, increase SOB, falls, increase confusion and then subsequently hospitalized . Patient then expired on 3/7/21.
COVID19 VACCINE	MODERNA	1083117-1	65+ years	0 days	Pt. received his second moderna vaccine on 03/05/2021 and his son reported that the pt. passed away after receiving his vaccine.
COVID19 VACCINE	MODERNA	1084180-1	65+ years	0 days	Patient came with husband to Vaccine clinic today 3/5 for 2nd dose of vaccine. Did well during and immediately after vaccine. Husband states patient has c/o severe chest pressure and pain for several weeks but has refused to come to ER for evaluation. Today, after getting vaccine dose and going to local bank, patient was in passenger side of truck when chest pain started again. Husband begged patient to let him take her to the ER but she said no, I'm fine and I don't want to go. She then went unresponsive. At a stop light, he was next to a couple of cops who he was able to wave down and proceed to escort them in to ER. Upon arrival to the ER, patient was unresponsive and pulseless. CPR was initiated, 1 defib, and 1mg of epi was given. Return of pulse was obtained, but husband asked for no life support and only comfort measures. Patient was admitted for comfort measures. I do NOT think this was related to her vaccine, but rather the unfortunately end to a sub-acute chest pain patient that declined multiple urgings to seek care. Patient then expired on 3/5/21 at 2037.
COVID19 VACCINE	MODERNA	1084419-1	60-64 years	0 days	EMS reported sudden onset of shortness of breath, patient grabbed his chest and collapsed. He stopped breathing. Wife began CPR with chest compressions at 5:00. Fire dept. arrived resumed CPR and attached AED but there was no shock advise. They placed an OPA as well (inserted an airway) and started ventilation. Asystole was confirmed, they continued CPR. After 5:25 they gave 3 rounds Epineferin and ended CPR at 5:46. They also checked his blood sugar and it was 136. Possible reaction to covid vaccine. Possible death due to history of cardiac issues. His PCP is requesting an autopsy
COVID19 VACCINE	MODERNA	1084685-1	65+ years	0 days	We received a phone call stating that the patient passed away overnight.
COVID19 VACCINE	MODERNA	1084800-1	50-59 years	0 days	Death. EMS called to residence 9 hours later for cardiac arrest. Pt pronounced at Emergency Room. Pt sent to ME office for autopsy.
COVID19 VACCINE	MODERNA	1088837-1	60-64 years	0 days	Patient received first vaccine dose on 3/10/21, waited for approximately 1 hour in Pharmacy after. Was walking to her vehicle and became short of breath. Patient got to her vehicle and called 911 due to severe shortness of breath. Rescue arrived on scene at approximately 11:00am, found patient in distress and administered epinephrine, methylprednisolone, and diphenhydramine. Patient placed on CPAP in rescue en route to ER, became unresponsive, frothing pink sputum. Intubated by paramedics en route with iGel device. Patient arrived to ER at 11:22am, went into cardiac arrest at 11:24am. Patient continued to be unstable, had multiple rounds of cardiac arrest and ROSC. Patient ultimately did not survive arrests, and pronounced dead at 2:37pm. Medications received during course in the ER - epinephrine 1mg x18 doses, sodium bicarbonate 50mEq x4 doses, calcium chloride 1g, insulin regular 10 units x1, furosemide 80mg x1, epinephrine titrated infusion, sodium bicarbonate infusion.
COVID19 VACCINE	MODERNA	1089215-1	65+ years	0 days	Syncopal episode followed by death. Unable to be revived. Coroner's case.
COVID19 VACCINE	MODERNA	1091138-1	65+ years	0 days	pt returned to his skilled nursing facility after his 2nd covid vaccine and at approx 10:45 pm he was in cardiac arrest. CPR was started and transported to Hospital. Pt was pronounced dead at 1:06 am on 3/11/21
COVID19 VACCINE	MODERNA	1091327-1	60-64 years	0 days	Death
COVID19 VACCINE	MODERNA	1095393-1	65+ years	0 days	Cardiac Arrest
COVID19 VACCINE	MODERNA	1098856-1	65+ years	0 days	Four hours after vaccine shot, she began with a headache then severe vomiting. She became in coherent and when brought to the hospital she had a brain hemorrhage. She passed away on 3/3/2021 at 3:05pm.
COVID19 VACCINE	MODERNA	1104845-1	60-64 years	0 days	Deceased received second Moderna dose on 3/11/2021 at unknown location and unknown time. Complained of 'side effects' which are unclear at this time. Had a sudden witnessed cardiac event on 3/14/2021 and was rushed to a local emergency department. Diagnosed with ST elevation MI and could not be fully resuscitated.

COVID19 VACCINE	MODERNA	1110439-1	65+ years	0 days	Tolerated Well without complications
COVID19 VACCINE	MODERNA	1115045-1	50-59 years	0 days	Death; A spontaneous report was received from a consumer concerning a 57 years old male patient who received mRNA-1273 for prophylaxis of COVID-19 infection and had died (death). The patient's medical history was not provided. Concomitant product use was not provided by the reporter. On 2 Mar 2021, approximately three hours prior to the onset of the symptoms, the patient received his second of two planned doses of mRNA-1273 for prophylaxis of COVID-19 infection. It was reported that the patient died three hours after receiving the 2nd dose in the ER. Treatment information was not provided. The cause of death was unknown. Plans for an autopsy were unknown. Action taken with mRNA-1273 in response to the event was not applicable. The outcome of the event of death was considered as fatal.; Reporter's Comments: This is a case of sudden concerning a 57 year old male who died three hours after receiving the second dose of the vaccine. Very limited information regarding this event has been provided at this time.; Reported Cause(s) of Death: unknown cause of Death
COVID19 VACCINE	MODERNA	1115944-1	50-59 years	0 days	1-2 hours after receiving Moderna vaccination patient began complaining of chest pain to family members but refused to seek medical attention. He was found deceased this morning (03/19/21) by his family. Medical Examiner determined time of death was around 8:40pm on 03/18/21.
COVID19 VACCINE	MODERNA	1115994-1	65+ years	0 days	03/02/21 the patient was visited by nurse. No signs of distress. Normal vitals. No GI concerns according to staff. Her appetite was her usual described as fair. She received her 2nd Moderna vaccination on 03/08/21. Within hour she became very ill according to facility staff. She began to vomit up to 5 times. Her stools became loose. She became more lethargic. She was started on compazine for the vomiting. Her oral intake was minimal. Her symptoms did not resolve and she was visited by the nurse again on 03/11/2021 where she was not very responsive. Her vitals included an irregular pulse and apnea noted in her breathing up to 15 seconds. She died on 03/12/21
COVID19 VACCINE	MODERNA	1116594-1	65+ years	0 days	Patient called EMS from for respiratory distress. EMS arrived, noted severe distress and hypoxia. Patient transported to Hospital Emergency Dept. Patient deteriorated to respiratory arrest and cardiac arrest. Per ED note, after 30 minutes of aggressive resuscitation (including approximately 19 minutes in the ED), no ROSC was achieved. Patient expired
COVID19 VACCINE	MODERNA	1119393-1	65+ years	0 days	Systemic: Death. Unknown cause as of reporting date. -Severe, Additional Details: PT caregiver called to report that the Pt passed away on 3/8/21 2 days post vaccine, Caregiver was distressed and not very able to provide more details due to recent nature of report.
COVID19 VACCINE	MODERNA	1122171-1	60-64 years	0 days	Moderna COVID-19 (mRNA-1273) vaccine treatment under Emergency Use Authorization(EUA): Decedent received vaccine and felt fine. Three hours later he became short of breath and went unresponsive.
COVID19 VACCINE	MODERNA	1122172-1	65+ years	0 days	Moderna COVID-19 (mRNA-1273) vaccine treatment under Emergency Use Authorization(EUA): The decedent received the shot at 4:30pm and was found deceased at 10pm the same day.
COVID19 VACCINE	MODERNA	1123247-1	65+ years	0 days	Our agency was alerted that the patient passed away on 3/16/2021
COVID19 VACCINE	MODERNA	1126060-1	60-64 years	0 days	death 2 and half hours after receiving the first Moderna vaccine; A Spontaneous report was received from a health care professional concerning a 61 year old male patient, who received Moderna's COVID-19 vaccine (mRNA-1273) and reported death. The patient's medical history as provided by the reporter included diabetes, history of shortness of breath, cardiac history. Concomitant medications included metoprolol, metformin and glipizide. On 05 Mar 2021, prior to the onset of events the patient received his first dose of their two planned doses of mRNA-1273 (Batch N0: 030a21a) intramuscularly for prophylaxis of covid 19 infection. On 05 Mar 2021, it was reported that the patient died 2 and half hours after receiving the first Moderna vaccine. The patient had no symptoms during observation 15 minutes after receiving first Moderna vaccine. The patient's PCP ordered an autopsy. Treatment information not included. Action taken with mRNA-1273 in response to the events was not applicable. On 05 Mar 2021, it was reported that the patient died.; Reporter's Comments: This is a case of sudden death in a 61-year-old male subject with hx of diabetes, history of shortness of breath and cardiac history, who died 2 1/2 hours after receiving first dose of vaccine. Very limited information has been provided at this time.; Reported Cause(s) of Death: unknown cause of death
COVID19 VACCINE	MODERNA	1126619-1	65+ years	0 days	His vitals signs was stable after vaccine was administered, but the resident was expired in 85mins after given 1st dose of Covid Moderna vaccine.

COVID19 VACCINE	MODERNA	1129805-1	65+ years	0 days	<p>Death; unconscious; in and out of consciousness; weak, very weak; blood pressure was very low; little light headed; A spontaneous report was received from consumer concerning a 88 years old female patient who received Moderna's COVID-19 vaccine (mRNA-1273) and experienced a little light headed/ dizziness, weak, very weak/asthenia, blood pressure was very low/ hypotension, in and out of consciousness/depressed level of consciousness, unconscious/ loss of consciousness and passed away. The patient's medical history was reported as heart issues. Concomitant medications taken by the patient included levothyroxine, isosorbide, acetylsalicylic acid, metoprolol, furosemide, warfarin, antibiotics. On 3 Mar 2021, prior to the onset of the event, the patient received their first of two planned doses of mRNA-1273 (Lot number: 015M20A) intramuscularly in the right arm for prophylaxis of COVID-19 infection. On 3 Mar 2021, when the patient got home the night, after getting the shot, patient was a little lightheaded, she seemed to be okay on 04 Mar 2021 and 05 Mar 2021. Patient had complained of being weak and her blood pressure was very low on 08 Mar 2021. She was progressively started getting weaker. On 09 Mar 2021, she was very weak and was in and out of consciousness. Patient was taken to the hospital, and she became unconscious and then passed away. Patient passed away on 09 Mar 2021. The patient died on 09 Mar 2021. The cause of death was unknown. Plans for an autopsy were unknown. Treatment activities for event was not provided. Action taken with mRNA-1273 in response to the events was not applicable. The outcome of events, unconscious, a little light headed, weak, very weak, blood pressure was very low, in and out of consciousness was unknown. The outcome was considered fatal.; Reporter's Comments: This is a case of sudden death in a 88-year-old female patient with a history of heart issues, who died 6 days after receiving first dose of vaccine. Very limited information has been provided at this time.; Reported Cause(s) of Death: Unknown cause of death</p>
COVID19 VACCINE	PFIZER\BIONTECH	1065551-1	65+ years	0 days	<p>Pt received 2nd Pfizer BioNTech Covid 19 EUA vaccine @1:50 pm; Pt released from Observation @2:09 pm. Approximately 2:18 pm RN called to parking lot and observed pt having difficulties. Called for EMS & crash cart. Vitals taken 2:20 BP 83/55, no respirations noted, pt unresponsive. AED attached. EMS arrived 2:22 and took over care of pt. and transported @2:40 pm to Hospital. Per wife, pt has history of PE in Oct. 2020, HTN, diabetes with insulin pump, obesity, gastroparesis, home oxygen and uses motorized scooter. Wife also said pt had allergy to iodine not previously reported, and MD had stopped Zarelto subsequent to 1st Pfizer vaccine 2/8/21 ""due to breathing difficulty"". Patient was unable to be resuscitated. Time of death 14:59.""</p>
COVID19 VACCINE	PFIZER\BIONTECH	1071935-1	18-29 years	0 days	<p>Patient received the vaccine around 11 am. He hadn't been feeling well (headache, dizziness) per report and initially called in to work. He then decided to come to work and was found down in a patient bathroom during his shift on our Facility while taking care of a patient (he was a nurse aid). Patient was coded and the team and was transferred to our Facility ED. He expired 3/3 2112</p>
COVID19 VACCINE	PFIZER\BIONTECH	1076017-1	65+ years	0 days	<p>elderly diabetic man with AFib/RVR who presented with multiorgan failure few hours after receiving his 2nd COVID shot today and ultimately expired. he did well after the 1st COVID shot and subsequently developed this multiorgan failure after the 2nd shot. had his second COVID vaccine shot around 4 pm, went home and collapsed, lay on the floor for a few hours refusing to call paramedics, eventually wife called 911, he arrived to ED and was dead a few hours later. -on arrival the pH was 6.7, agonal breathing, low BP, lactate 18, but no MI, no stroke, no apparent infection/sepsis. important to note that he had a covid vaccine just a few hours from collapsing and dying.</p>
COVID19 VACCINE	PFIZER\BIONTECH	1077079-1	65+ years	0 days	<p>Patient was alert and oriented with no signs or symptoms of sickness prior to immunization for 2nd dose of Pfizer COVID19 vaccine. Temperature 98.7. Patient under hospice care and DNR status for wound care (coccyx). Patient has no recollection of first dose, but no adverse reactions to first dose per her caregivers. Patient did not appear to have any adverse reactions to the vaccine after the 15 minute observation period. About 1 hr after vaccine administration, patient was reported deceased. No signs of swelling or allergic reaction at site of injection.</p>
COVID19 VACCINE	PFIZER\BIONTECH	1077148-1	60-64 years	0 days	<p>It was reported to us that at @1822 the patient sustained a Seizure at home. EMS was called and arrived to initiate CPR. CPR was performed but the patient was declared deceased by EMS at his home.</p>
COVID19 VACCINE	PFIZER\BIONTECH	1077297-1	65+ years	0 days	<p>He collapsed and went into cardiac arrest</p>
COVID19 VACCINE	PFIZER\BIONTECH	1081308-1	65+ years	0 days	<p>Death 3 days afterwards, undetermined cause at this time.</p>

COVID19 VACCINE	PFIZER\BIONTECH	1084965-1	65+ years	0 days	Injection in left arm at 4:15 pm. on Friday 3/5/2021. At 9pm, 3/5/2021 he complained of chest pain and was taken by ambulance to Medical Center Emergency Room. He was diagnosed with gallstones and discharged at approx 4:00 am on 3/6/2021. He found non responsive at home shortly thereafter.
COVID19 VACCINE	PFIZER\BIONTECH	1085254-1	65+ years	0 days	Severe abdominal pain unable to eat or sleep for 36 hours. He went by ambulance to the Hospital emergency room. They tried to pump his stomach but he aspirated and went into cardiac arrest. He was revived but never regained consciousness. (The ICU Dr said that he had blood clots in his abdomen from a recent stroke. We were unaware of him having a stroke other than in 2026. The same Dr. said that he had necrosis in his lungs from aspirating. The necrosis was from his bowel dying) He was put on a ventilator and given drugs to increase his heart rate. On 3-5-21 the heart drugs were reduced and he died. I was with him when he received the vaccination and he was healthy, just old. I think that the shot killed him.
COVID19 VACCINE	PFIZER\BIONTECH	1090417-1	65+ years	0 days	Error: Wrong Dose of Vaccine - Too High
COVID19 VACCINE	PFIZER\BIONTECH	1096461-1	65+ years	0 days	Patient received vaccine at 10:35am, was observed for 15 minutes then returned home with family. Patient began to not feel well, experienced cardiac arrest as witnessed by son, was taken to hospital Emergency Department where she expired at 12:50pm.
COVID19 VACCINE	PFIZER\BIONTECH	1103970-1	65+ years	0 days	Reported by EMS per report from wife that he was ""sick after shot"" and got worse during the night. Wife found him the following morning cold and pale, pulseless. Dispatch called at 719AM. Pt pronounced on the scene and taken to Funeral Home. Uncertain if Medical Exam is planned""
COVID19 VACCINE	PFIZER\BIONTECH	1109552-1	65+ years	0 days	Family call Clinical Lead to car for elderly woman in backseat of car who had become unresponsive. · Patient lying on side. Wearing portable NC o2. Unresponsive to verbal/sternal rub. No pulse, No resps. · Called AMR to car side who called 911. Transferred patient to a gurney and began CPR as we transferred to AMR rig. · EKG - showed PEA - CPR continued - patient intubated by AMR - epi is given. · Pt transported by AMR/Fire to hospital. · Pt was a full code on Hospice - she passed away 3/11/21 with the following cause of death: 1.Acute-on-chronic hypoxemic/hypercarbic respiratory failure, multifactorial in origin. 2. Possible aspiration pneumonia, present on admission. 3. Bronchiectasis, chronic, secondary to asbestosis. 4. Acute combined metabolic and toxic encephalopathy, present on admission. 5. Out of hospital pulseless electrical activity arrest. 6. Hyperkalemia. 7. Cardiogenic shock. 8. Acute kidney injury. 9. Lactic acidosis. 10. Acute diastolic congestive heart failure. 11. Severe protein-calorie malnutrition.
COVID19 VACCINE	PFIZER\BIONTECH	1112117-1	65+ years	0 days	Patient was a patient on hospice, had terminal dx of frontal lobe dementia. NP visited with patient on 03/10/2021, notable decline/flank pain, fever 101. Patient passed away on 03/12/21, Medical Director wanted this reported to VAERS d/t the vaccination was within 72hrs of the pts death.
COVID19 VACCINE	PFIZER\BIONTECH	1121695-1	18-29 years	0 days	The patient, who has no significant past medical history including diabetes, presented with very severe diabetic ketoacidosis one week after receiving the vaccine. He developed severe metabolic encephalopathy, aspiration pneumonia, and was placed on mechanical ventilation. At the time of this reporting, he is brain death (awaiting apnea test confirmation). He is expected not to survive.

COVID19 VACCINE	PFIZER\BIONTECH	1122742-1	65+ years	0 days	He died around 5 o'clock; This is a spontaneous report from a contactable consumer (patient's wife). An 89-year-old male patient received the first dose of BNT162B2 (PFIZER-BIONTECH COVID-19 VACCINE, solution for injection), via an unspecified route of administration on 12Mar2021 13:00 at a single dose (lot number was reported as NEEU200, the reporter did not know if its 2 or Z) for COVID-19 immunization. Medical history allergic to Penicillin, has a long list of allergies, neck pain and sleep disorder (sleep aid). Concomitant medications included diphenhydramine hydrochloride (BENADRYL), clopidogrel bisulfate, calcitriol, melatonin (MELATONIN) taken for sleep aid, Phillips Laxative tablet Magnesium (not appropriately paraphrased and clarified, as reported), simvastatin, terazosin hydrochloride, tizanidine hydrochloride (TIZANIDINE HCL) for when he had the pain in neck (he didn't take that hardly ever), vitamin C [ascorbic acid] and Multivitamin one a day. On Friday 12Mar2021, the reporter and the patient went to get the Covid shot. Their appointment was at 12:30 but they were in line long time before they got the shot. They got the shot around 13:00 and then they have to wait 15 minutes before they could leave. They drove up, they were ready to shoot us with the needle and they asked the patient, asked was he allergic to anything and the reporter answered for him and said yes, Penicillin and other long list and then they gave him the shot. They never did go over his allergies. They got home about 13:30, so which would take us about that long to get home. The patient died around 5 o'clock and the reporter didn't know if this was connected or not with his death. The patient died on 12Mar2021. It was not reported if an autopsy was performed. Information on the lot/batch number has been requested.; Sender's Comments: This case of death was provided with minimal details and autopsy results not available. However, drug causality cannot be completely excluded for BNT162B2 injection, only due to plausible chronological relation. Otherwise, information received was so limited to prevent a thorough medical assessment for patient death. The impact of this report on the benefit/risk profile of the Pfizer drugs is evaluated as part of Pfizer procedures for safety evaluation, including the review and analysis of aggregate data for adverse events. Any safety concern identified as part of this review, as well as any appropriate action in response, will be promptly notified to Regulatory Authorities, Ethics Committees and Investigators, as appropriate.; Reported Cause(s) of Death: He died around 5 o'clock
COVID19 VACCINE	PFIZER\BIONTECH	1123532-1	65+ years	0 days	Dose given at 1649hrs. At 2030hrs, complaints of headache and diarrhea. At 0100hrs on 03/21, family noticed patient unresponsive and not breathing. Fire rescue called out and pronounced her at 0210hrs.
COVID19 VACCINE	PFIZER\BIONTECH	1124195-1	65+ years	0 days	Abdominal pain, nausea, diarrhea, headache, muscle aches, and fatigue 1-2 days after vaccination prompting transport via EMS to ER from home. Had cardiac arrest while in the ER x2, subsequent anoxic brain injury and death following removal of ventilator support.
COVID19 VACCINE	PFIZER\BIONTECH	1124382-1	65+ years	0 days	Death Narrative: Patient received first COVID vaccine dose on 3/13/21 at 07:53 without complications. Home telehealth nurse informed by family member on 3/18/21 the patient passed away on 3/13/21 at approximately 1300. Per medical record documentation, ""Patient had been at facility getting COVID vaccine that morning at 0800, came home and was taking out his garbage when he started to stumble and fell to his knee, a neighbor saw and assisted patient up and was walking with him back to the apartment when ""...he stopped breathing and fell over, dead."" Per medical record review, patient had several co-morbidities including hypertension, hyperlipidemia, chronic hyponatremia, alcohol abuse, alcoholic fatty liver, chronic thrombocytopenia, and GERD.""
COVID19 VACCINE	PFIZER\BIONTECH	1124794-1	30-39 years	0 days	Extreme head ache, chest pain, fever 101 F. Gave 1000 mg Tylenol, albuterol via nebulizer Q4hr. Died 3/20/2021 approx 11:00 am from Cardiac Arrest.

COVID19 VACCINE	PFIZER\BIONTECH	1142674-1	65+ years	0 days	She developed chills she couldn't control and fell asleep all afternoon, evening and through the night. I spoke with her twice and my uncle and aunt checked on her three times, all three she was freezing cold and too tired to get up. In the morning, she was dazed, cold and walked to the bathroom, where she collapsed to her death. Paramedics could not revive her. My mom died Saturday morning - within the 24-hour period of her vaccine. She was feeling so great leading up to it, active, stripping the guest bedroom sheets, bubbly, and excited for us to be able to finally visit her soon.

COVID19 VACCINE	MODERNA	1088615-1	50-59 years	1 day	Death within 30 days of vaccination, vaccinated on 3/5/2021 pronounced dead on 3/6/2021. Unknown if any side effects from vaccine. No ER visit found at local hospital.
COVID19 VACCINE	MODERNA	1092483-1	65+ years	1 day	Both patient and spouse we given their Moderna prime dose on 2-10-21. Both patient and spouse agreed to observe the post vaccination waiting period and reported no concerns. On 3-10-2021, they returned for their boost dose at 12:30 PM. Prior to administration of their second dose, they reported only mild headache and fatigue that presented approximately 12 hours after their first dose was administered. Once again, spouse and patient observed the post vaccination waiting period and reported no issues. On 3-11-21, I was notified that patient had passed away at home. In speaking to spouse, he stated that they both went to bed that evening with with a mild headache and fatigue. Spouse stated that he woke up early that morning with a more pronounced headache and had difficulty sleeping. He noted that at approximately 5:18 AM patient seemed to breathing heavily and may have gasped a bit. He checked on her again around 6:40 and determined that she had passed away. He contacted EMS and the technician confirmed that she had passed away. Spouse reports that the state will perform and autopsy in the next few days at the direction of Medical staff.

COVID19 VACCINE	MODERNA	1092653-1	65+ years	1 day	Patient received the vaccine on the evening of 03-09-2021. R.N. states she was ""fine "" at 440 AM bed check. At 0830 03-10-2021 patient was found slumped over on her bathroom toilet having expired sometime between 440AM and 830 AM""
COVID19 VACCINE	MODERNA	1093986-1	40-49 years	1 day	Received a phone call stating that the patient complained of not feeling well on 3/11/21 while at work and that the patient died that night while at home.
COVID19 VACCINE	MODERNA	1094165-1	65+ years	1 day	Patient received her first dose of the Moderna Covid vaccine at the Health unit on 03/10/21. Her family states she began experiencing nausea and vomiting last night (03/11/2021) and then started having chest pain at around midnight. This morning (03/12/2021) she was still experiencing vomiting and chest pain. She collapsed at approximately 07:30 and her family initiated CPR and EMS was called. She was brought to the Hospital via Ambulance at 08:18 in cardiac arrest. The emergency department was unable to resuscitate her and she was pronounced dead.
COVID19 VACCINE	MODERNA	1095238-1	65+ years	1 day	Patient at the time of vaccination on 3-8-21 has having issues with shortness of breath and edema consistent with congestive heart failure, the following day on 3-9-21, he was having more issues with shortness of breath, tachycardia, low O2 saturation. He was given meds in the clinic and monitored until he was feeling better with increased O2 sats. He was found unresponsive on his housing unit one hour later and failed to respond to resuscitation efforts and was pronounced expired at 1047.
COVID19 VACCINE	MODERNA	1095300-1	50-59 years	1 day	According to Medical Center's report, patient was brought to ED deceased upon arrival via EMS on 03/12/2021 at 8:57am. Patient received his second dose on 3/10/21. Patient was hospitalized again (reason for hospitalization unknown) where he passed away 3/11/21 at hospital.""
COVID19 VACCINE	MODERNA	1104364-1	65+ years	1 day	Death within 24 hours of receiving vaccine
COVID19 VACCINE	MODERNA	1106667-1	65+ years	1 day	Information here obtained from daughter: on Thursday patient had an uneventful fistulogram with angioplasty. Patient got vaccine at end of usual Friday am dialysis treatment. He was observed for about 30"" and no untoward event noted, vitals usual. At home on Saturday morning, seemed not quite himself by wife as reported by daughter, from whom i got his information. He gets up late as hemodialysis starts at 515 am. No reported problems on Friday. On Saturday morning, he seemed not himself but sat down and ate breakfast around 9 am. On getting up from table he got suddenly weak, his head rolled back and his eyes rolled up. 911 called and he was given resuscitation efforts of unknown duration which were unsuccessful. He was pronounced dead at 11 am and the mortuary was called. No pre-mortem labs, et al.""

COVID19 VACCINE	MODERNA	1108261-1	65+ years	1 day	death Narrative: Patient received 1st dose of Moderna COVID-19 vaccine on 03/08/2021. Patient died 03/09/2021. Medical examiner received report that patient was alert before a fall on the night of 03/08/2021. Death certificate will report death likely due to arrhythmia due to underlying CHF. Contributing factors include diabetes.
COVID19 VACCINE	MODERNA	1108365-1	65+ years	1 day	She had breathing problems, bowel movement problems, sharp pain -site unknown No appetite and nausea. Went to the Doctor on wednesday and they gave her a prescription for nausea (promethazine) 12.5mg She Passed away 03/12/2021 at 8:54pm waiting to be picked up by a friend that was going to take her to the emergency room/hospital.
COVID19 VACCINE	MODERNA	1108588-1	65+ years	1 day	After vaccine (2nd dose) on 3/04, patient resumed normal activities, running errands, etc. In the evening of 3/05, patient complained of extremely sore arms (not alleviated by painkillers) and nausea. Additionally, patient felt extremely cold. She went to bed early, at 7:00 pm, and was found dead the next morning 3/06 at 7:30 am. She had vomited. The coroner (not a medical examiner) declared cause of death as 1) cardiac arrest 2) hypertension and 3)hypercholesterolemia, based solely on medical records. There was no autopsy. Due to or despite medications, patient's blood pressure readings were typically low (last one 118/70), pulse normal (89), BMI 25.29, cholesterol levels normal (166/LDL 82), blood sugar 95.
COVID19 VACCINE	MODERNA	1108609-1	65+ years	1 day	Patient was found unresponsive the morning of March 14, 2021. She was pronounced dead at 5:33 AM. The medical examiner quoted natural cause of death.
COVID19 VACCINE	MODERNA	1111683-1	65+ years	1 day	Patient's niece reported that the patient's arm became sore, had stomach upset, fever the day after the vaccine. The following day the patient died.
COVID19 VACCINE	MODERNA	1111924-1	65+ years	1 day	Patient found demised at home on 3/17/2021
COVID19 VACCINE	MODERNA	1112123-1	65+ years	1 day	This patient was on hospice, we are reporting this to VAERS at the Medical Directors request d/t patient's death within 48 hours of the second dose vaccine. The death occurred the morning following his second dose of the Moderna COVID-19 Vaccination, vaccine received on 03/11/21 and patient date of death 03/12/21 at 9:41 am. This was a hospice patient with a terminal dx of CKD. This is being reported at the request of the Medical Director for the hospice team, d/t the patient's death occurred within 48 hours of receiving the second dose of this vaccine. The nurse case manager stated the pt was declining as they were on hospice for a terminal condition and had co-morbidities, Pt did show more decline after receiving COVID-19 vaccination and patient passed away within 48 hours of receiving second vaccination dose.
COVID19 VACCINE	MODERNA	1112370-1	65+ years	1 day	The patient got the Moderna vaccine on 3/2/2021. On 3/3/2021 he suffered a dissection of the ascending thoracic aorta and died.
COVID19 VACCINE	MODERNA	1112773-1	50-59 years	1 day	Moderna #1 vaccine given at 130pm March 11th 2021. Pt had history of asthma and frequent nebulizer use and had it in car with her for drive-thru vaccine clinic we did at location, which has a large parking lot. We gave 80 doses. Pt checked off anaphylaxis on the intake form so Dr spoke to her and she changed it to no history of anaphylaxis and only has history of asthma. So we gave her the vaccine. About 5 minutes later in car parking lot she started to use her personal nebulizer. I saw her in passenger side of car using a personal nebulizer so I talked to her and her daughter to find out what was going on. They said she has exacerbations all the time and this was not out of ordinary for her. I checked pulse ox and did a lung exam, etc, and she was stable. She seemed baseline according to history by her and her daughter. As she seemed at baseline and clinically was comfortable and conversant whole time, and she felt better after her nebulizer, I told them to have a low threshold for going to ER or calling 911 if her asthma was worse or different than her usual symptoms. They agreed. According to daughter, she did well until about 24 hours the next day. The daughter said she was fine and she went to store and when she returned EMTs were intubating patient and apparently the patient used her epipen and called 911 herself. Approximate time of expiration was 230pm on March12th 2021.

COVID19 VACCINE	MODERNA	1115348-1	Unknown	1 day	death; A spontaneous report was received from a HCP concerning about a 86 years old female patient, who received Moderna's COVID-19 vaccine (mRNA-1273) and died. The patient's medical history was not reported. Concomitant medications were not reported. On 05 Mar 2021, prior to the onset of the events, the patient received their first of two planned doses of mRNA-1273 (Batch number: 026A21A) via intramuscular in left deltoid for prophylaxis of COVID-19 infection. On 06 Mar 2021 the patient died next day after vaccination, who left quite well after vaccination from the facility, the reason for death is not known. Treatment information was not provided. Action taken with mRNA-1273 in response to the event is not applicable. The outcomes of all the event is not applicable.; Reporter's Comments: This is a case of death in a 86 years old female patient, with unknown past medical hx or current co morbid conditions and concomitant medications, who died one day after receiving first dose of vaccine. Very limited information has been provided at this time.; Reported Cause(s) of Death: unknown cause of death
COVID19 VACCINE	MODERNA	1117316-1	65+ years	1 day	Sister in law called on 3-19-2021 to report that had died a day after receiving his Moderna vaccine. She stated he was found in his driveway and was unable to be resuscitated after being rushed to the hospital.
COVID19 VACCINE	MODERNA	1120756-1	65+ years	1 day	On Friday night, 3/19/21, patient spiked a fever, had shortness of breath, and had blood coming out of his nose and mouth per patient's daughter-in law. 9-1-1 was called, paramedics arrived at the home at 5AM on Saturday, 3/20/21 per patient's daughter. Patient died.
COVID19 VACCINE	MODERNA	1120816-1	65+ years	1 day	Death. No autopsy performed.
COVID19 VACCINE	MODERNA	1122640-1	50-59 years	1 day	Death 3/11/21
COVID19 VACCINE	MODERNA	1123847-1	50-59 years	1 day	Patient had no reactions to first vaccine post dialysis. The morning after the patient received the vaccine, patient expired at home. Police stated that the death was vaccine related.
COVID19 VACCINE	MODERNA	1123977-1	65+ years	1 day	Not even 20 hrs after she received the vaccine she couldn't breathe, she's been fine nothing wrong at all. 7am she was awake sitting up in bed doing crosswords told her great granddaughter to have a good day at work and would see her shortly . 739 I walked out the room to take my kid to work was gone till 751 not even 12 minutes and I came in and my gram couldn't breathe was yelling for me saying she couldn't breathe. It sounded like my gram had come over with upper respiratory problems in a matter of 10 minutes she was gasping for air called 911 spoke to operator my gram was talking saying she couldn't breathe she was trying to breathe, my grams last words were if they don't hurry I'm going to die I'm 100% sure my gram was dead in my arms before EMS arrived. Yes she was 95 but she is a healthy lady have had no issues of health problems lately. We've done everything to keep her save from the virus and then she gets her 2nd moderna shot and she's dead 20 hrs later there's a huge problem old age or not
COVID19 VACCINE	MODERNA	1124577-1	65+ years	1 day	My father received the first Covid shot 3/2; he woke up 3/3 with severe body aches and weakness, which we thought nothing of. However, every day, he got weaker and weaker. He has been treated for Liver cancer, he received his first infusion of Opdivo almost 4 weeks before the vaccination. About 7 days after the shot, he was having trouble swallowing so he went to the ER to get a CT scan. He was found to have greatly elevated troponins, the DR was baffled he wasn't having any chest pain; they were apparently not trending either., he has never had a heart attack or any other heart problems, takes Nadolol for high blood pressure. The CT scan showed significant growth of his tumors which had been stable for a year and the last CT scan was the end of January; liver enzymes were also significantly elevated whereas they were stable before. My father deteriorated rapidly, and died on 3/18/21. The day he got the shot just prior, he was hauling wood, shoveling snow and living a normal life feeling good. The day after the shot he could barely get out of bed he was so weak, until he finally died 16 days later.
COVID19 VACCINE	MODERNA	1125778-1	60-64 years	1 day	3/20/21 06:22 pm Resident c/o Nausea and feeling full- Tube feeding placed on Hold- Resident started vomiting- Zofran 4 mg given- Positive outcomes. 03/21/2021- 0430 Resident found unresponsive on morning rounds- w/ weak pulse, shallow breathing. O2 via NC increased to 5 L, NP, Family (Code Status DNR)- Power of attorney ordered to send out- MR notified- Upon arrival no rhythm detected- Death pronounced at 0445

COVID19 VACCINE	MODERNA	1125936-1	65+ years	1 day	3-21-21 at 5:35am - Intermittent coughing during HS. Afebrile. Upper lung fields noted congestion; clearing when coughing/turned repositioned per staff, Afebrile. 3-21-21 at 9:30am - In residents room repositioning him, resident vomited tube feeding. Turned him on his side and swept out his mouth. Tube feeding pump turned off. Breathing became labored. Second nurse placed non-rebreather mask on him. Called 911 to take resident to hospital. 3-21-21 9:45am EMS now at bedside. Pulse palpable, Cheyne Stokes respirations. O2 on per non-rebreather mask. EMS assessed resident- now in VT/VF CPR initiated. Code cart placed outside of door. 3-21-21 10:00am Resident transferred out to Rig with an organized heart rhythm. Dr. (on call for Dr.) notified of event and transport to hospital.

COVID19 VACCINE	PFIZER\BIONTECH	1101780-1	65+ years	1 day	Resident expired the next day
COVID19 VACCINE	PFIZER\BIONTECH	1116377-1	65+ years	1 day	91 yo father received vaccine, was mobile and alert before first shot, but required wheelchair by second vaccination due to being weak. After second vaccination, was not able to stand or move after 36 hrs, at which point he was taken to the hospital. At hospital, all vital signs were good except an MRI showed cancer in spine. Shot was given 3/1 and my father passed on 3/18. Obviously this shot did not cause metastatic cancer, but I believe it did induce an inflammatory response of some kind that caused it to progress extremely quickly.

COVID19 VACCINE	PFIZER\BIONTECH	1122501-1	65+ years	1 day	Patient expired next day
COVID19 VACCINE	PFIZER\BIONTECH	1123329-1	65+ years	1 day	Presented to Emergency department in cardiac arrest. Pt's family reports patient complaining of indigestion throughout the night. Awakened this morning but returned to bed. Family noted his breathing became loud and then stopped. EMS called. Patient in PEA arrest when they arrived. Patient's family reports he received COVID-19 vaccine day before via facility. I have notified the vaccine clinic and received the Lot number of the vaccine use when I called.
COVID19 VACCINE	PFIZER\BIONTECH	1124604-1	65+ years	1 day	Pt presented SOB several days prior to receiving vaccine. His sister reported he had severe COPD and was getting progressively worse. On the day pt was vaccinated, his sister picked him up for the appointment and pt refused a wheelchair. Pt walked into the clinic on his own and received his vaccine. Sister reported pt walked to the car after his vaccine and was winded. She dropped him off at his house and called him later to check up on him. Pt stated he was feeling fine but his arm was sore. Pt's sister called the next morning and reported that he sounded terrible. He was struggling to breathe and was SOB. His sister went over to his house to check on him and wanted to take him to the doctor's office or the hospital. Pt refused at that time. Pt agreed to make a doctor appointment for later in the afternoon. Sister left at noon. She stated her brother had made a doctor appointment for 4:00 at Family Practice. Upon arriving, pt started walking towards the entrance and became SOB. His significant other asked the doctor's office for a wheelchair and was denied. Pt coded in parking lot of Doctor's Office and passed away at 4:31 p.m.
COVID19 VACCINE	PFIZER\BIONTECH	1138370-1	50-59 years	1 day	he started feeling sick day after vaccine with flu like symptoms, seen in ED 5 days after vaccination, diagnosed with COVID19, About 1 week after that, he was found dead at home on his couch.

COVID19 VACCINE	JANSSEN	1093939-1	65+ years	6 days	No report of negative event after 15 min wait past receipt of vaccine. Notified by Coronor, on 3/11/2021 that this patient expired on 3/11/2021 at home. Not sent to hospital. Pronounced at home. Sent to Funeral Home
COVID19 VACCINE	JANSSEN	1114806-1	40-49 years	6 days	Diagnosis: Cortical vein thrombosis, massive intracerebral hemorrhage with tentorial herniation, thrombocytopenia. Clinical Presentation and Course: 1 week after receiving Janssen COVID19 vaccination, patient developed gradually worsening headache. On March 17th, patient presented to Hospital with dry heaving, sudden worsening of headache and L sided weakness. Evaluation with head CT revealed a large R temporoparietal intraparenchymal hemorrhage with 1.3cm midline shift. She ended up getting intubated for worsening mental status. On evaluation at arrival in Medical Center, she was noted to have extensor posturing. Repeat imaging revealed worsening midline shift to 1.6cm. CTA showed cortical vein thrombosis involving the right transverse and sigmoid sinus with tentorial herniation. Patient developed brain herniation and brain death was pronounced on March 18th, 2021.
COVID19 VACCINE	MODERNA	1106733-1	65+ years	6 days	First dose of Moderna COVID-19 vaccine given 1/7/21. Second dose of Moderna COVID-19 vaccine given 3/8/21. No adverse effects noted after vaccination. Resident was on hospice care since 2/27/2021 with poor food and fluid intake prior. Admitted to hospice with hypokalemia, failure to thrive.

COVID19 VACCINE	JANSSSEN	1134819-1	50-59 years	7 days	She developed a large pulmonary embolus, and she died on 3/17 at Hospital. She developed symptoms of SOB on 3/11, and was admitted to the hospital. She was initially stable and not requiring oxygen and was sent home on anticoagulation. However she returned the same day with worsening symptoms, troponin now elevated, and ECHO showing signs of right heart strain. Embolus on imaging had increased in just over days from previous CT scan. She became pulseless and died despite resuscitative efforts. It is my opinion (Dr.) that she died of a pulmonary embolus, and an autopsy is pending.
COVID19 VACCINE	JANSSSEN	1147618-1	50-59 years	7 days	cardiac arrest
COVID19 VACCINE	MODERNA	1101286-1	65+ years	7 days	Large Stroke
COVID19 VACCINE	MODERNA	1102736-1	65+ years	7 days	Spouse of an existing client signed up for a COVID-19 vaccination and received his first injection of Moderna on 03/07/21 by ARNP. He denied any symptoms of illness, including COVID-19, on the vaccination date. He was educated re: possible side effects and adverse effects and was asked to report any such effects; no interim contact received. This provider's office called the existing client on 03/15/21 with a routine matter and was advised that this individual had passed away the preceding day. This provider spoke to the existing client, who reported that the cause of death is unknown. The existing client did not believe that her spouse's death and the vaccination were related. She was asked to notify this provider if any further information is discovered and agreed to do so.
COVID19 VACCINE	MODERNA	1108472-1	50-59 years	7 days	cardiac arrest Narrative: Per medics, Patient was gardening when he stated he felt dizzy and collapsed. Wife started CPR until medics arrived. Patient arrived at the hospital after 20min of pulseless V tach and 10 min of PEA.
COVID19 VACCINE	MODERNA	1122080-1	40-49 years	7 days	Patient's received 2nd dose of Moderna vaccine Friday 3/12. Her husband reported she had not unexpected fatigue, malaise, and fever for 1 day but better after that. On Monday she began complaining of shortness of breath. This progressively worsened and she started having presyncopal episodes. On Saturday she was unable to come down the stairs in the house so husband planned to take her to the hospital but she stood up and passed out and woke up quickly. He decided to call EMS. By the time she presented to our hospital she was cyanotic and agonal breathing. On moving her from EMS stretcher to ED bed she had PEA cardiac arrest. She underwent mechanical device CPR with only brief (<1 min) ROSC x1. She at some point did have a shockable rhythm. Cath lab was notified and she was taken emergently to the cath lab with ongoing mechanical device CPR. Peripheral VA ECMO was placed after about 1.5 hours. Pulmonary angiogram was done which showed massive saddle PE with near complete obliteration of the right pulmonary tree and some filling defects in the left tree as well. At that time she had severe mixed respiratory and metabolic acidosis with a lactate of 24. She also had no gag or corneal reflex, minimally responsive pupils, and no response to noxious stimuli. Mechanical thrombectomy was attempted with some result. She was transferred to the SICU with increasing pressor requirement, and DIC. Ultimately, the venous catheter of the ECMO circuit malfunctioned thought to be secondary propagating IVC thrombosis. Family decided to withdraw care and she passed away.
COVID19 VACCINE	PFIZER\BIONTECH	1095668-1	60-64 years	7 days	62 yo M with no known medical history awoke 12:15 am on 3/11/2021 and told his wife he had ""pain all over"". When she asked if it was chest pain, he said he didn't know. He went downstairs, vomited, slumped over against the wall behind the couch, and became unresponsive. Wife called 911 and was instructed to begin CPR. EMS crew arrived shortly after that and performed prolonged resuscitation efforts as per ACLS protocol. Pt pronounced at 3:15 am. Patient had not seen a physician in many years, had not had any vaccines in over 20 years, took no medications, and had no known medical history. He did have a strong family history of heart disease and had told his wife the week prior to his death that he had suffered a several-hour bout of chest pain that resolved spontaneously 2-3 days prior to his telling her about it. He refused to seek medical evaluation despite her urging.""
COVID19 VACCINE	PFIZER\BIONTECH	1100685-1	65+ years	7 days	Death 1 week later. No other information available.

COVID19 VACCINE	PFIZER\BIONTECH	1111546-1	65+ years	7 days	One week post vaccine, caller's mother started to feel ""phlegm-y"", coughing up clear phlegm. The next day she was more lethargic, coughing. Called her PCP, recommended Robitussin and Mucinex which she took. Continued to feel worse. No fever although she had cold sweats. She felt a lot of GI pain, fullness, could not eat/drink. Called PCP again by the 4th day of feeling bad. Recommended Augmentin and she took 2 doses. On 3/12 and 3/13, had difficulty breathing, coughing. Called EMS on 3/14 and taken to hospital where she was treated for dehydration and pneumonia with a broad spectrum antibiotic and vancomycin, IV. Given morphine for pain. She tried to take a GI cocktail which she felt like she was choking on. That evening on her BP bottomed out. They continued to give IVFs to raise BP as fast as possible. She was unable to receive chest compressions due to aorta issue and her heart gave out and she stopped breathing on 3/14.""
COVID19 VACCINE	PFIZER\BIONTECH	1125494-1	65+ years	7 days	He was found deceased in his home 7 days after receiving the 2nd vaccine,
COVID19 VACCINE	MODERNA	1102800-1	65+ years	8 days	Patient received a covid vaccine on 03/05/2021. Daughter reports there were no side effects that night or the following days. The next Saturday, March 13, 2021, the daughter was at her parents house checking up on them. Her father was in the bathroom as she passed in the hall. He came out of the bathroom and proceeded to the living room, she stated dad are you ok? He said he couldn't breath. Giving his history of COPD and being short of breath sometimes, she didn't think anything of it. She proceeded to follow him to his chair and was checking his oxygen tank that he had been using with ambulation. It still had some in the tank. She raised her head to tell him he still had some in the tank and saw that he had started ""agonal breathing"". Daughter is a nurse and knew he needed help. She phone for an ambulance and with the help of her mother got patient to the floor and started CPR. Paramedics arrived on scene, continued CPR and administered meds and also intubated, but were unsuccessful in their efforts.""
COVID19 VACCINE	MODERNA	1124307-1	65+ years	8 days	The patient was found dead in his home on 3/18/2021, 8 days after vaccination. Due to the remoteness of where the individual lives and his lack of housemate, it is unknown how long he had been dead, but it is not believe that he was dead for more than 1-2 days. He had no adverse reactions in the 15-30 minutes that he was observed post-injection. He also reported only a sore arm to the public health nurse in an email a few days after his vaccination.
COVID19 VACCINE	MODERNA	1125891-1	60-64 years	8 days	Patient died with an unknown cause. He was found on the kitchen floor with no blood present. We requested an autopsy but because the County Coroner said there was no foul play suspected, that they would not perform an autopsy on the body to determine the cause of death even though the family had requested an autopsy. The Funeral Home stated to us that it had the looks of a heart attack, but he was not qualified to make that determination. He stated that the way the blood had stopped and purpled in his neck, gave him the indication that the heart was unable to pump all the way.
COVID19 VACCINE	JANSSEN	1111699-1	65+ years	10-14 days	Patient developed symptomatic COVID infection with symptoms starting 3/13, was admitted to the hospital for respiratory failure on 3/16 and expired on 3/18/21
COVID19 VACCINE	MODERNA	1102722-1	65+ years	10-14 days	Patient presented to Hospital ED on 3/14/21 with respiratory distress. Patient was tested for COVID-19 and found to be positive on 3/14/21 in the hospital ED. Patient was a DNR. Hospice was consulted (this writer is employed by Hospice). The patient passed away on 3/15/2021. Per family patient had recently received COVID-19 vaccine. Vaccine information verified in portal.
COVID19 VACCINE	MODERNA	1107656-1	65+ years	10-14 days	Patient was found dead on 3/15/2021
COVID19 VACCINE	MODERNA	1124363-1	65+ years	10-14 days	patient died at home. apparently he awoke in the middle of the night and asked for help, then collapsed. CPR failed. patient and family did not want an autopsy. suspect sudden cardiac death
COVID19 VACCINE	MODERNA	1126293-1	65+ years	10-14 days	Death 10 days after receiving first moderna covid vaccination. Was not told by patients family cause of death, unclear if there is a link between vaccination or not.

COVID19 VACCINE	MODERNA	1151700-1	65+ years	10-14 days	Narrative: Patient received dose 1 of Moderna COVID-19 vaccine on 3/11/21 from clinic. Vaccine was administered to patient without complications and patient was observed for 15 minutes post-vaccination without any adverse effects. No documentation as to any adverse effects following the 15 minutes post-vaccination. 11 days later on 3/22/21, EMS was dispatched to patient's home and patient was found lying supine, unconscious, and unresponsive to stimuli. Patient was noted to have shallow breathing per EMS staff, and was subsequently brought to the hospital. Per family, patient lives alone and was feeling well - they had spoken to her two days prior to the event. Per family patient did not have recent fevers, vomiting, diarrhea, or cough. Also no recent medication changes or trauma. PMH includes stroke approx. 8 years ago, gout, HLD, HTN, and RLS. BP upon admission was 126/93, HR 123, temp 37.1 degrees Celcius, RR 28. Patient noted to smell of urine. CT showed large completed right sided infarct consistent with MCA stroke. Per neurology the lesion was not recoverable and patient would be unlikely to regain any function. Family was notified and poor prognosis was discussed. Patient has been very clear in the past that she would prefer ""to go when her time came"". She had a DNR And DNI as well. Daughter requested to pursue comfort measures for patient, therefore she was transferred to hospice care. Patient passed away the following day on 3/23/21. Death very unlikely due to COVID-19 vaccination since CT imaging clearly showed cerebral infarct and patient had a PMH of stroke.""
COVID19 VACCINE	PFIZER\BIONTECH	1104031-1	50-59 years	10-14 days	Patient died of cardiac arrest at hospital 3/12/2021
COVID19 VACCINE	PFIZER\BIONTECH	1118229-1	65+ years	10-14 days	Sudden Death
COVID19 VACCINE	PFIZER\BIONTECH	1146787-1	65+ years	10-14 days	death Narrative: Pt has been declining prior to starting COVID vaccine doses; then he got COVID after first dose (VAER reported); and then was admitted to hospice for dyspnea, chronic pain, pressure ulcers, urinary incontinence with foley catheter in place, bedbound, dysphagia.
COVID19 VACCINE	JANSSEN	1142078-1	65+ years	15-30 days	Patient was a high functioning 97-year-old female with a history of CLL diagnosed 1 year ago on no treatment prior to arrival, chronic stable thrombocytopenia, chronic kidney disease, past history of breast cancer and bladder cancer in remission, transfusion dependent anemia of chronic disease, covid 19 vaccination on 3/5/2021, who presented to the emergency room on 3/25/2021 unresponsive found by the family and emergency services was called. The paramedics found her temperature to be 101.6 and her room air sat was 87%. In the ER CT of the head revealed acute subarachnoid hemorrhage. There was no trauma. CT the abdomen and pelvis showed lymphadenopathy and splenomegaly consistent with her known CLL and new bilateral lung infiltrates. Patient's white blood cell count was 124,000 consistent with her known CLL. Patient prior was high functioning and still drove herself to her doctor's appointments. The day prior she told her son she was feeling slightly nauseous and ill and went to bed early. She was admitted with a subarachnoid hemorrhage which was felt to be spontaneous and not traumatic. She was not on any anticoagulation prior to arrival. She was also admitted with severe sepsis felt possibly due to aspiration pneumonia or pneumonia in general and she did have fever and bilateral infiltrates on imaging. covid 19 and influenza neg. The decision was made to place her on comfort care after discussion with family. She ultimately expired on 3/28 At 14:48 PM in the presence of her family
COVID19 VACCINE	JANSSEN	1144220-1	65+ years	15-30 days	Bacteremia - strep epidermidis, developed respiratory distress required intubation for hypercapnic respiratory failure. Developed PEA on 3/28 died.
COVID19 VACCINE	MODERNA	1113647-1	65+ years	15-30 days	Patient died 3 days after vaccination
COVID19 VACCINE	MODERNA	1122393-1	65+ years	15-30 days	Death Narrative: Around the end of January 2021, patient was admitted to a home hospice program due to worsening of patient's Parkinson's Disease and Dementia. It was noted on the hospice programs Plan of Care that patient had severe, progressive dysphagia due to disease. Patient lost 20 pounds over the last 2 months prior to admission to hospice program. Patient had severe tremors, dystonia, and was dyspneic with minimal exertion. Patient received Moderna's Covid vaccine on 3/3/21. On 3/13/21, patient got progressively worse. He stopped eating and drinking and started to exhibit Cheyne-Stokes breathing. Hospice nurse noted that patient only had a few days remaining. On 3/18/21, patient passed away.
COVID19 VACCINE	MODERNA	1123405-1	65+ years	15-30 days	None stated.

Dataset: The Vaccine Adverse Event Reporting System (VAERS)

Query Parameters:

Date Died: Mar., 2021 to Mar., 2021

Date of Onset: Mar., 2021 to Mar., 2021

Date Report Completed: Mar., 2021 to Mar., 2021

Date Report Received: Mar., 2021 to Mar., 2021

Date Vaccinated: Mar., 2021 to Mar., 2021

Event Category: Death

State / Territory: The United States/Territories/Unknown

Vaccine Products: COVID19 VACCINE (COVID19)

VAERS ID: All

Group By: Vaccine Type; Vaccine Manufacturer; VAERS ID; Age; Onset Interval

Show Totals: False

Show Zero Values: Disabled

—

Help: See <http://wonder.cdc.gov/wonder/help/vaers.html> for more information.

—

Query Date: Apr 9, 2021 8:09:04 PM

Suggested Citation: Accessed at <http://wonder.cdc.gov/vaers.html> on Apr 9, 2021 8:09:04 PM

—

Messages:

1. The full results are too long to be displayed, only non-zero rows are available.
2. VAERS data in CDC WONDER are updated every Friday. Hence, results for the same query can change from week to week.
- 3. These results are for 236 total events.**
4. When grouped by VAERS ID, results initially don't show Events Reported, Percent, or totals. Use Quick or More Options to restore them, if you wish.
5. Click on a VAERS ID to see a report containing detailed information for the event.

—

Footnotes:

1. Submitting a report to VAERS does not mean that healthcare personnel or the vaccine caused or contributed to the adverse event (possible side effect).

—

Caveats:

1. <p> VAERS accepts reports of adverse events and reactions that occur following vaccination. Healthcare providers, vaccine manufacturers, and the public can submit reports to VAERS. While very important in monitoring vaccine safety, VAERS reports alone cannot be used to determine if a vaccine caused or contributed to an adverse event or illness. The reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. Most reports to VAERS are voluntary, which means they are subject to biases. This creates specific limitations on how the data can be used scientifically. Data from VAERS reports should always be interpreted with these limitations in mind. </p> <p> The strengths of VAERS are that it is national in scope and can quickly provide an early warning of a safety problem with a vaccine. As part of CDC and FDA's multi-system approach to post-licensure vaccine safety monitoring, VAERS is designed to rapidly detect unusual or unexpected patterns of adverse events, also known as "safety signals." If a safety signal is found in VAERS, further studies can be done in safety systems such as the CDC's Vaccine Safety Datalink (VSD) or the Clinical Immunization Safety Assessment (CISA) project. These systems do not have the same limitations as VAERS, and can better assess health risks and possible connections between adverse events and a vaccine. </p> <p> Key considerations and limitations of VAERS data: Vaccine providers are encouraged to report any clinically significant health problem following vaccination to VAERS, whether or not they believe the vaccine was the cause. Reports may include incomplete, inaccurate, coincidental and unverified information. The number of reports alone cannot be interpreted or used to reach conclusions about the existence, severity, frequency, or rates of problems associated with vaccines. VAERS data are limited to vaccine adverse event reports received between 1990 and the most recent date for which data are available. VAERS data do not represent all known safety information for a vaccine and should be interpreted in the context of other scientific information. </p>

2

3. Some items may have more than 1 occurrence in any single event report, such as Symptoms, Vaccine Products, Manufacturers, and Event Categories. If data are grouped by any of these items, then the number in the Events Reported column may exceed the total number of unique events. If percentages are shown, then the associated percentage of total unique event reports will exceed 100% in such cases. For example, the number of Symptoms mentioned is likely to exceed the number of events reported, because many reports include more than 1 Symptom. When more than 1 Symptom occurs in a single report, then the percentage of Symptoms to unique events is more than 100%. More information: <http://wonder.cdc.gov/wonder/help/vaers.html#Suppress>.
4. Data contains VAERS reports processed as of 4/2/2021. The VAERS data in WONDER are updated weekly, yet the VAERS system receives continuous updates including revisions and new reports for preceding time periods. More information:

<http://wonder.cdc.gov/wonder/help/vaers.html#Reporting>.

5. Values of Event Category field vary in their availability over time due to changes in the reporting form. The "Emergency Room/Office Visit" value was available only for events reported using the VAERS-1 form, active 07/01/1990 to 06/29/2017. The "Congenital Anomaly/Birth Defect", "Emergency Room", and "Office Visit" values are available only for events reported using the VAERS 2.0 form, active 06/30/2017 to present. These changes must be considered when evaluating count of events for these categories.

6. For more information on how many persons have been vaccinated in the US for COVID19 to date, see <https://covid.cdc.gov/covid-data-tracker/#vaccinations/>
